| <b>Greater Hume Shire Council</b>                                  |  |
| Culcairn Swimming Pool - Amenities Upgrade                         | Upgrade both male and female toilets and change areas: add disabled facilities including change tables; improve accessibility; increase privacy for patrons (including those with disabilities). Upgrade kiosk area for greater safety and ease of use by staff and patrons.   |
| Jindera and Gerogery West Tennis Clubs - Court Upgrade Project     | At Jindera Tennis Club and Gerogery West Tennis Courts: the proposed funding will be used to resurface a total of eight tennis courts. At Jindera: in order to improve safety, we will install two new light towers and replace current lights with energy-efficient 900 watt LEDs.  |
| Greater Hume - Council Halls Upgrade Project                       | Greater Hume Shire Council currently has 15 public halls. This project will upgrade eight public halls in some of the smallest locations within the area. We predict that these upgrades will have a significant positive impact on the local communities where works are to be undertaken.  |
| Walla Walla Sportsground - New Function Rooms, Kiosk and Amenities | The project can be broken down into two stages. Stage one: construct standards-compliant kiosk, including steel frame, horizontal orb cladding, insulated walls and roof, roller doors for food service area, accessible entrances, and new internal furniture. Stage two: construct function room and amenities adjacent to kiosk, to be completed in a similar building style as the kiosk. All aspects of the upgrade will also require sewerage, drainage, water, and gas service support.   |
| Jindera and District Swimming Pool - Upgrade of Facilities         | This proposed project for the Jindera Swimming Pool has four key outcomes: adequate pool temperature management; improved accessibility of the 25-metre pool; general improvement of facilities for community groups and programs, such as families, youth groups, aqua aerobics classes, swim squad, and school events; and improvement of the kiosk to meet OHS standards.   |
| Walbundrie Recreation Ground Refurbishment                         | Funding for this project will be used to upgrade facilities at Walbundrie Sportsground, ensuring that it is an inclusive and safe location for the whole community. In keeping to safety standards we will upgrade the cricket nets, completely refurbish the kitchen, upgrade the gas hot water system, install lighting, and make general repairs to the grounds. We will also install a seating area along the tennis courts to facilitate a better view and protection from the elements for spectators. Finally we will extend and secure our storage area to ensure the safety of all items housed within. |
| Culcairn Town Tennis Club - Facilities Upgrade                     | This project will include: installation of chain fencing, including top and bottom rails, around the six main tennis courts; upgrade of kitchen facilities in club rooms; installation of security windows and doors; construction of shade sails over play equipment; construction of a concrete slab and roof for BBQ area; and replacement of toilets.  |
| Brocklesby Recreation Reserve - New Function Rooms                 | The project is to create an accessible and comfortable function room for the Brocklesby Recreation Reserve, which will serve as a community focal point year-round. We will replace the existing tin shed with a brick veneer structure, which will include a social area, kitchen/catering area, bar and stock cool room, play area, office, shower, toilets (including disabled access toilets and a change table), and a large verandah. The tin shed will be demolished and removed, and the new structure will be built in its place, to the north-east of the existing brick structure.                    |
| Jindera Country Golf Club - New Putting Greens                     | This project seeks to enhance the grounds at Jindera Country Golf Club by replacing five existing synthetic putting greens and constructing a dam to improve irrigation. Having removed the current greens, the site will be prepared with a compacted, stabilised mix of crusher dust and river sand on which the new greens will be placed. We will finish the perimeters of the new greens with turf, and enlarge the current green sizes (9m x 9m). The project will be completed with the construction of a new dam to improve irrigation.  |
| Bungowannah Tennis Club Fence and Water Supply                     | Bungowannah Tennis Club: replace chicken wire fencing with fencing adherent to modern playing and safety standards; Bungowannah Recreation Reserve: upgrade the water supply with a new bore and pump. This water supply is used by the local hall, Tennis Club, and for the maintenance of the Reserve.   |
